

Public Sector Information Technology Awards 2007

October 3rd, 2007 · Victoria Conference Centre · Victoria · British Columbia

Eligibility

These awards recognize leadership innovation and excellence in the management and use of information technologies within the extended public service of British Columbia, including Crown Corporations, municipalities, public education and healthcare organizations.

Nomination deadline: Tuesday, September 11th, 2007

Eligible projects must have been completed within the last two government fiscal years. (April 1, 2005 – March 31, 2007). A phase of an ongoing project may be nominated IF it has been for all practical purposes a stand-alone project. For full nomination information and judging criteria, please visit our website at:

Organizational Transformation

Descriptions:

This award recognizes projects where information technology played a key role in making it possible for major organizational transformation to occur. Project should relate to the following organizational topics:

- Organizational communication, people management, relationship management, change management;
- Project management, knowledge management;
- Risk management and measurement and/or systems development projects.

Criteria:

- Describe the transformation – what changed in the organization as a result of the transformation.
- Describe how this project differed in approach as compared to traditional approaches the organization has used before.

Citizen Engagement

Descriptions:

The citizen engages with government in a variety of ways: through input and participation in the legislative process and through day to day interactions with government staff and the services that government provides. This occurs at municipal, provincial and federal levels. Projects being considered for an award in this category should demonstrate the following:

- Citizen centered service delivery. Effective and efficient processes to enable the public to assist in the creation of benefit for citizens;
- The foregoing processes are designed to be open and accessible so that citizens within every socio-economic group can have the opportunities to participate;
- That these public processes provide clear well articulated benefit.

Criteria:

- A description of the processes and/or services.
- The process used for public consultation and how this process was implemented.
- A description of the resulting public benefits.
- What data is used to support the citizen engagement and measure results?
