

***Fourth Annual  
International Conference  
on Public Safety:  
Technology & Counter-Terrorism***

**March 14-15, 2005**

**The Fairmont San Francisco Hotel**

**San Francisco | California | U.S.A.**

**[www.rebootconference.com/sanfrancisco2005](http://www.rebootconference.com/sanfrancisco2005)**

**Conference Co-Moderators:**

**Tom Gede**

Executive Director  
Conference of Western  
Attorneys General, U.S.

**Donald Santarelli**

Former Administrator of the  
Law Enforcement Assistance  
Administration, Associate Deputy  
Attorney General, and Counsel  
to President Ford

*"This conference has become the premier post-9/11 gathering of international public officials in technology and counter-terrorism."* Tom Gede, Executive Director, Conference of Western Attorneys General, U.S.

**Keynote Speakers:**

**George J. Tenet**

Former CIA Director  
United States of America

**Stephen E. Flynn**

Homeland Security Expert  
& former U.S. Coast Guard  
Commander

# ***Conference Focus***

## ***World class professional development opportunities***

- Leading edge advancements in counter-terrorism technologies
- Global perspectives on policy and public safety issues
- Presentations by senior executive subject matter experts
- Networking opportunities with international public safety and security professionals

## ***Target Audience***

**North and South America, Asia Pacific and Europe**

- Law enforcement officials
- Port security officials
- Public safety policy makers, practitioners and first responders
- Coast Guard, Defense, Immigration, Customs and DHS
- Specialists in the technology sector
- Transportation and port terminal companies

## ***Plenary Sessions***

**More than 30 unique presentations will examine new trends and solutions to meet challenges in:**

- International Port Security
- International Border Security
- Sharing of Law Enforcement Information and Intelligence
- Cyber Security and Identity Management
- Biometrics Identification

# Keynote Speakers

**George John Tenet** was sworn in as the 18th Director of Central Intelligence on July 11, 1997, following a unanimous vote by both the Senate Select Committee on Intelligence and the full Senate. In this position, he led the United States Intelligence Community, a team of 14 foreign intelligence organizations, and presided over the daily activities of one of its members, the Central Intelligence Agency.

**George J. Tenet**  
Former CIA Director  
United States of America

**Dr. Stephen Flynn** is Senior Fellow for National Security Studies at the Council on Foreign Relations in New York. A retired U.S. Coast Guard commander, Flynn is an expert on homeland security, transportation security, border control, and international crime. His book "America the Vulnerable" points out shortcomings in America's homeland security, and outlines his own bold yet practical plan.

**Stephen E. Flynn**  
Homeland Security Expert  
& former U.S. Coast Guard  
Commander

## Conference Co-Moderators

## Featured Speakers

**Tom Gede**

Executive Director,  
Conference of Western  
Attorneys General, U.S.

**Donald Santarelli**

Former Administrator of the  
Law Enforcement Assistance  
Administration, Associate  
Deputy Attorney General, &  
Counsel to President Ford

*"This conference has become the premier  
post-9/11 gathering of international public policy  
officials in technology and counter-terrorism."*

Previous successful conferences took place in  
Whistler, British Columbia, (2002), Bal Harbour, Florida (2003)  
and Ottawa, Ontario (2004)

In Association with:  
**C.W.A.G.**  
Conference of Western  
Attorneys General

# PARTNERS IN PROFILE

**S**ENIOR REPRESENTATIVES FROM GOVERNMENT, POLICE, SECURITY AND THE TECHNOLOGY SECTOR MET IN OTTAWA ON APRIL 26–27, 2004, FOR THE THIRD ANNUAL CONFERENCE ON TECHNOLOGY AND COUNTER-TERRORISM, ENTITLED *STRATEGIES FOR PUBLIC SAFETY TRANSFORMATION 2004*. PRESENTED BY REBOOT COMMUNICATIONS AND HOSTED BY THE CANADIAN ASSOCIATION OF CHIEFS OF POLICE AND PUBLIC SAFETY AND EMERGENCY PREPAREDNESS CANADA (PSEPC), THIS TWO-DAY GATHERING SERVED AS A UNIQUE OPPORTUNITY FOR SENIOR EXECUTIVES FROM CANADA, THE UNITED STATES AND ABROAD TO NETWORK AND COLLABORATE ON PUBLIC SAFETY ISSUES.

PHOTO COURTESY OF REBOOT COMMUNICATIONS

FROM LEFT TO RIGHT: JOHN PISTOLE, EXECUTIVE ASSISTANT DIRECTOR, U.S. FEDERAL BUREAU OF INVESTIGATION; MARGARET BLOODWORTH, DEPUTY MINISTER, PSEPC; GIULIANO ZACCARDELLI, COMMISSIONER, RCMP; BOB MORINE, VICE PRESIDENT AND GENERAL MANAGER, IBM CANADA; AND PHILLIP WEBB, CHIEF EXECUTIVE OFFICER, POLICE INFORMATION TECHNOLOGY ORGANISATION, UNITED KINGDOM.

Leaders from police and national security in Canada and from around the world were also well represented in panel discussions, and included the participation of RCMP Commissioner Giuliano Zaccardelli, Chief Edgar MacLeod (President, CACP), Chief Vince Bevan (Ottawa Police Service), John Pistole (Executive Assistant Director, U.S. Federal Bureau of Investigation), and Phillip Webb (Chief Executive Officer of the United Kingdom's Police Information Technology Organization). Presentations by these leaders provided delegates with vital perspectives and insight on how police can better share information on a domestic and international scale. Specific approaches to overcoming barriers to information sharing were also discussed during panel deliberations.

In keeping with the international scope of this yearly conference, delegates were treated to two special keynote addresses. The first was by Richard Clarke, the author of *Against All Enemies: Inside America's War on Terror*, and former U.S. Presidential advisor on counter-terrorism. Among the key points in his speech, Clarke emphasized that technology today affords governments unparalleled abilities and potential access, and contended that this matter should be further explored through an expanded civic dialogue.

The second guest keynote was delivered by Kevin Mitnick, an internationally known former computer hacker, who was once considered the most wanted computer criminal in U.S. history. Through a series of case studies, Mitnick provided a compelling case for why organizations need to double-up their safeguards of personal information against hackers and other intruders who seek to use that information to their advantage.

By all accounts, *Strategies for Public Safety Transformation 2004* was a great success. Based on the success of this gathering and its predecessors (held in Whistler, B.C., in 2002, and Bal Harbour, Florida, in 2003), the fourth Annual Conference is being planned for 2005 in San Francisco, California.

Details on the 2005 Conference will be available soon at the Reboot Communications website at: [www.rebootcanada.com](http://www.rebootcanada.com).

"We were pleased to bring this conference to Ottawa for the very first time," explained Greg Spievak, president of Reboot Communications. "Timely panel discussions and keynote speakers are hallmarks of this exclusive annual conference, and this year's gathering was no exception."

Delegates heard over 30 unique presentations by distinguished international authorities. Among the speakers representing the Government of Canada, delegates heard from PSEPC Deputy Minister Margaret Bloodworth, who provided an overview of her department and its near-term public safety priorities, including interoperability, the National Security Policy, Lawful Access, as well as measures to improve critical infrastructure and ensure cyber security. Additional in-depth information on the department's recently-launched Interoperability Project was shared with delegates in a separate presentation by Project Director Mark Bornais (PSEPC Integrated Justice Information Secretariat).

The vital importance of fostering improved interoperability surfaced at several points during keynotes and panel discussions. Speakers noted that governments in Canada, the United States and abroad must embrace the challenge of getting various agencies to interconnect information without compromising privacy or the security of their individual systems. A range of solutions in this regard were demonstrated in presentations and by numerous vendors at the conference exposition hall, including solutions such as user authentication systems, data encryption and wireless connectivity.
